

Together We Can

Home Learning

At The Federation of St Joseph's, we have selected to use Google's G Suite to support school/home learning for all the pupils. We pride ourselves on providing a varied and all-encompassing learning experience for our pupils and Google's G-Suite provides the online line tools required to support and enhance teaching and learning at St Joseph's.

Google G Suite provides a range of applications for different activities such as Docs (word processing), Slides (presentations) and Sheets (number) that can be used anywhere access to the internet is available; without the need to install any software to devices.

Along with these individual applications we will be using Google Classroom.

What is Google Classroom?

Google Classroom allows teachers to create an online classroom area in which they can manage all the documents and resources that their pupils need.

Documents are stored online and can be edited in the G Suite applications, or pupils can upload documents that they have created on other software such as Microsoft Word.

Google Classroom is based around teacher/student interactions. This means that teachers can review the work submitted by the pupils and provide personal feedback directly on their work to move the learning on.

Alongside Google Classroom, we would like to bring to your attention additional home learning, provided by St Joseph's, that can be accessed by your child at home:
