Summer 2

Year 6 Summer 1 Curriculum

1. St Joseph's Wider Curriculum
2. Reading including phonics
3. Writing
4. Maths
5. RE
6. Science
7. Computing
8. History or Geography

St Joseph's Wider Curriculum

The wider curriculum focus this term is 'Democracy'

During this theme the school will be investigating what democracy is and how we can participate in it in the UK.

The children will be taking part in debates with votes at the end of them.

PSHE objectives will also be taught throughout the unit of work. These include:

- To understand that some jobs are paid more than others and money is one factor which may influence a person's job or career choice: that people may choose to do voluntary work which is unpaid.
- To identify the kind of job that they might like to do when they are older.
- To recognise a variety of routes into careers (e.g college apprenticeship, university)
- To know and learn about some of the skills that will help them in their future careers e.g team work, communication and negotiation and in our enterprise project.

There will be many opportunities throughout the term for the school and the wider community to come together to celebrate our 'Enterprise'

Events include: trips to get inspiration, a careers week and the SJF Market.

Reading including phonics

Expectations for Summer 1

Reading expected over the week - Half an hour a day

Days reading books expected in school -Mon-Fri

Library visit day - Monday

Objectives for Summer 2

- Continue to read and discuss an increasingly wide range of fiction, poetry or plays, non-fiction and reference books.
- Identify how language, structure and presentation contribute to meaning.

Key vocabulary: Explaining, evidence, predict, discuss

Ways to help your child and useful resources

We expect the children to read for half an hour at home, and there will be chances for them to read for pleasure during the day. They should read a variety of books, fiction and nonfiction, as well as from a range of sources. Books, websites, newspapers, magazines etc...

Ask the children what they are reading and what they have understood about the text.

Writing

Expectations for Summer 1

The pupils are expected to write a page of good quality writing a day. They are expected to be independent with their writing and use a purple pen to make any edits or change of spellings.

Objectives for Summer 2

- I can plan, write and edit an autobiography
- I can evaluate and edit my writing ensuring consistent use of tense throughout.
- I can write effectively for a range of purposes and audiences. Selecting appropriate language that shows awareness of the reader.

Key vocabulary: Adverbials. Cohesion. Conjunctions. Metaphors. Smilies. Atmosphere. Modal verbs. Noun phrases.

Ways to help your child and useful resources

Please encourage the children to read as this gives them ideas and vocabulary for their writing ideas. When they complete their English homework, please ensure that this is independent as it gives them the chance to develop their skills of writing at length.

Maths

Expectations for Summer 2

The children are expected to understand the relationships between area and perimeter and to calculate the volume of objects. They will also need to be aware of the geometrical features of both 2D and 3D shapes and understand how to calculate the size of an angle as well as drawing them accurately using a protractor.

Objectives for Summer 2

Area, Perimeter and Volume

- recognise that shapes with the same areas can have different perimeters and vice versa
- recognise when it is possible to use formulae for area and volume of shapes
- calculate the area of parallelograms and triangles
- calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres (cm^3) and cubic metres (m^3), and extending to [other units](#)

Geometry

- draw 2-D shapes using given dimensions and angles
- recognise, describe and build simple 3-D shapes, including making nets
- compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons
- illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius
- recognise angles where they meet at a point, are on a straight line, or are

vertically opposite, and find missing angles.

Algebra

- use simple formulae
- generate and describe linear number sequences
- express missing number problems algebraically
- find pairs of numbers that satisfy an equation with 2 unknowns
- enumerate possibilities of combinations of 2 variables

Key vocabulary: squared, cubed, length, width, breadth, height, expression, equation, linear, angles, obtuse, acute, reflex. Radius, diameter, parallelogram, triangle, quadrilateral, polygon

Ways to help your child and useful resources

- Go through the weekly arithmetic test with your child, encouraging them to explain their methods to you.
- Check that your child can spell the names of the numbers correctly.
- Ensure they know basic facts and methods and rules when working with fractions, decimals and percentages
- They are confident and secure with their times tables
- Play maths games.
- Look for maths in your environment.

RE

Expectations for Spring 2

We expect the children to be reflective in not only their learning, but in themselves and have their hearts open to God.

Objectives for Spring 2

- To know that Jesus' miracles led many to believe he was the son of God.
- To understand why Jesus washed the disciples' feet.
- To know about the Passion and death of Jesus.
- To understand and reflect on what the resurrection of Jesus means for us

Key vocabulary: incarnation, miracles, passion, resurrection, disciples, reflect, betrayal,

Ways to help your child and useful resources

Talk to your child about theirs and your faith. Discuss how they can be more like Jesus in their daily lives and reflect on their actions and words. Discuss the meaning of Lent and why we celebrate Easter.

Science

Expectations for Spring 2

By the end of the unit, the children will understand: What creates light; how light is reflected and how light travels

Objectives for Spring 2

- recognise that light appears to travel in straight lines
- use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye
- explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes
- use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them

Key vocabulary : light source, reflection, refraction, reflected, refracted, travels, straight line

Ways to help your child and useful resources

Computing

Expectations for Summer 2

Children will know how to be safe on the internet, and have an understanding of networks and online communication.

Objectives for Summer 2

- To identify the purpose of writing a blog.
- To identify the features of successful blog writing
- To plan the theme and content for a blog.
- To understand how to write a blog and a blog post.
- To consider the effect upon the audience of changing the visual properties of the blog.
- To understand how to contribute to an existing blog.
- To understand the importance of commenting on blogs.
- To peer-assess blogs against the agreed success criteria.
- To understand how and why blog posts and comments are approved by the teacher.

Key vocabulary: Safety. Online. Networks. World Wide Web. WWW. Blog. Approval. Archive. Collaborate. VLOG

Ways to help your child and useful resources

Talk to your child about online safety and ensure they are aware of online dangers.

Geography

Expectations for Summer 2

unit covers a range of fundamental skills needed for orienteering, such as agility and endurance, navigation skills and map reading. During the unit, children will also be required to work as part of a team, to solve a range of problems that focus on collaboration and effective communication. They will improve their understanding of maps and learn about the features of an orienteering map, applying this understanding when completing an orienteering exercise. In the final lesson of the unit, they will work collaboratively to plan and prepare an orienteering course and also have a go at completing timed orienteering courses that others' have designed. There is a focus on cooperation, communication and teamwork throughout the unit, which are all essential skills needed for outdoor adventurous activities

Objectives for Summer 2

- understand what a compass is and can use one to find north;
- know the four cardinal directions on a compass (N, E, S, W);
- follow directional instructions including clockwise, anti-clockwise, 90°, 180° and 360° turns;
- know and understand some of the different features of a map, including symbols and a key;
- follow a simple map to give directions;
- work with a partner to complete the missing information on a map

Key vocabulary: Map, compass, position, distance.

Ways to help your child and useful resources

Use Maps with them to explore parts of their journey
